

Insurance Intelligent Automation

A comprehensive view on an integrated ‘intelligent’ automation approach

HCL Insurance Solutions

Customer expectations of faster, hyper-personalized, and assisted self-services have spiraled to new heights in this era of digital adoption. New, disruptive business models are democratizing innovation in the industry and Insurtech's are upending yesterday's success strategies with value added services and disrupting businesses across the insurance value chain. While carriers are grappling with the potentially conflicting needs of reducing tech debt / Managing legacy eco systems while enabling the new business models, many of the core technologies have matured to support this need. HCL has defined a set of capabilities needed to manage this new paradigm through the “Insurer of the future” construct. This is enabled by HCL's Novus Insurance offerings consisting of HCL's IP/products along with the Insurtech partner eco system.
